## zPoint Products's Dual Relay (2x digital out)

The **zPoint Dual Relay Unit** is wired to a power source of up to 277 VAC, and switches the AC power to two loads. The Switched Relay Unit receives ZigBee commands to set each of the two relays on and off, and replies with status information. The Switched Relay Unit can switch two loads, each up to 277 VAC at 10 A.
